## **YPOG advises Quantum Systems on expansion of Series B round to over €100 million**

**Hamburg, September 26, 2024** – YPOG advised Quantum Systems on the expansion of its Series B financing round to over €100 million. The round was led by new investors Notion Capital and Porsche SE. In addition, existing investors also participated again.

Quantum Systems has gained a clear competitive advantage through its state-of-the-art drones with integrated artificial intelligence (AI). By combining hardware, software and AI, the company is transforming business operations and improving efficiency across industries including mining, construction, agriculture, utilities, public safety and defense. In all of these areas, the collection, analysis and processing of aerial sensor data offers decisive advantages.

With the new financing round, Quantum Systems plans to drive forward its internationalization and promote further innovation. The capital will enable the company to expand its production capacities and invest more in research and development, particularly with a strong focus on software and artificial intelligence.

In October 2023, the YPOG team already advised Quantum Systems on the first part of its Series B financing round.

### **Team**

Dr. Adrian Haase (Lead, Transactions), Partner, Hamburg

Dr. Benjamin Ullrich (Transactions), Partner, Berlin

Alexandra Steifensand (Transactions), Associate, Berlin/Hamburg

Dr. Gerrit Breetholt (Transactions), Associate, Hamburg

### **About Quantum Systems**

Quantum Systems specializes in the development, design, and production of small Unmanned Aerial Systems (sUAS). The company's range of electric vertical take-off and landing (eVTOL) sUAS are built to maximize range and versatility and provide operators with a seamless user experience. By integrating cutting-edge software capabilities like edge computing and real-time AI-powered data processing, Quantum Systems is building next-generation UAS for clients in defence, security, and the public sector.
